Experience –

UX/UI Designer @ Epilogue

Toronto, ON • June 2020 - Present

Leading design on critical features to reduce the rate of user drop-offs and improve the online Will-making experience.

Working closely with the development team on shipping features for mobile and web from conception to launch.

Creating product prototypes that foster collaboration and discussion among team members.

Web Developer + UX/UI @ University Health Network

Toronto, ON • April 2019 - Aug 2019

Led a design team to create a bespoke front-end framework and component library. Already adopted by all UHN research facilities.

Modernized information architecture and UX/UI by rebuilding 6 core websites from scratch. This included high-fidelity prototyping to development using HTML5 and CSS.

Teaching Assistant , Design + Dev Course @UWaterloo

Waterloo, ON • Jan 2019 - Dec 2019

Provided my experience in UX through teaching a second year web design course, providing assignment feedback, assisting with labs, and facilitating one-on-one guidance

Shared my extensive knowledge of HTML/CSS, layout, typography, colour theory, and accessibility for both web and app design

Projects —

Attendance Tracker Web App

Worked with a cross-functional team to build a web app to enable teachers to take and track attendance across numrous classes. Built using Bootstrap CSS Framework, HTML, Node.js + Express
